

**Russ Daniels**

*Vice President and Chief Technology Officer, EDS*

Russ Daniels is vice president and chief technology officer of EDS. In this role, he sets the technology strategy and architecture for HP's outsourcing services portfolio.

Daniels and his organization assist the EDS business unit in delivering configurable, standardized offerings and new technology-enabled services that help clients reduce cost and complexity while harnessing innovation to better serve their customers.

Daniels has more than 25 years of experience in the technology industry, specializing in software architecture, enterprise management, and software development methodologies. He has filled a wide range of staff and line management roles and run his own Internet Services business. In 2006, InfoWorld declared Daniels one of the industry's top 25 chief technology officers.

Previously, Daniels was chief technology of cloud services strategy, where he drove the overarching business and technology strategies for HP's approach to the cloud. From 2002 to 2007, Daniels was the chief technology officer of HP Software. During his tenure, the business tripled in revenue and emerged as a significant player in the software industry. He joined HP in 1999. Prior, Daniels spent 15 years at Apple, where he held a variety of technical and management positions, culminating in his role as a senior software architect.

Daniels holds a bachelor's degree from Ohio University.
